

# Glove Box Sampler

## Folding Sampler for Glove Boxes

The Glove Box sampler is designed so that it can be used within the confines of an isolator cabinet.

### Key Features

- Able to fit into a small transfer port
- Extendable up to 2m
- Available with attachments on the end for taking samples of liquids and powders
- Available in 316 stainless steel or hastelloy

The sampler was designed so that it can easily be assembled by an operator wearing gloves

Glove Box Sampler in the extended position

When folded the Glove Box Sampler is only 450mm long (smaller versions can be made - please ask for details)

### Powder Sampling Head

Range of sample volumes available: 5, 10 & 20ml

See page 47 for a description of this style of sampling tip.
