

Power Sampler

The Power Sampler consists of a convenient hand held drive unit which is used to drive an auger. The auger draws the powder up the lance and into the collecting vessel.

- Free Flowing Powders and granules. Cohesive Powders
- 316 stainless steel (contact parts).
- Satin Finish

Operation:

Insert the lance into the product. The auger within the lance will draw the product up the lance and deposit it in the collecting vessel.

Reversing the direction of the auger will allow material within the lance to be returned at the end of sampling.
