SLOT POCKET SAMPLER
GMP Raw Material Sampling Thief

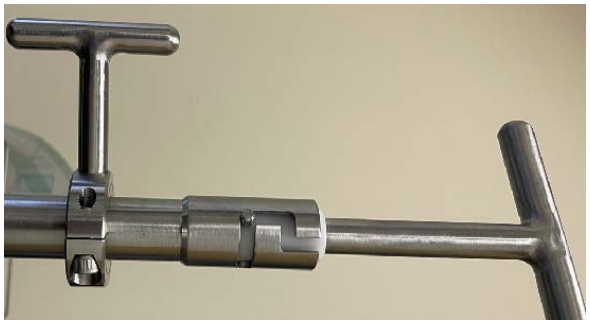

Zone Sampling or Cross Sectional Sampling

Specifications

Standard Model 6A GMP Raw Material Sampling Thief, 7/8" diameter, 3 ft long, made of 316 Stainless steel, with three 8.0" long x 0.5625" wide sample ports having removable partitions to facilitate individual or composite samples.
The bottom port starts at 1.5" from the tip. The second port starts 10 1/8" from the tip and the third starts at 18.75" from the tip ending at 26.75" from the tip.

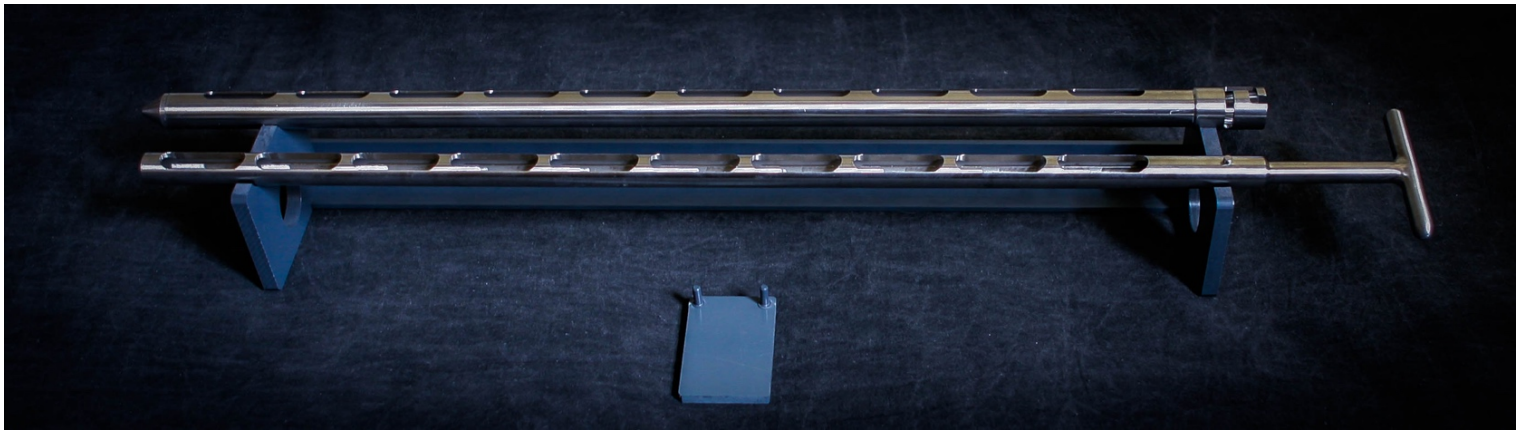

Each sample port accommodates about 40cc sample size.
The conical end piece is removable for easy cleaning of the outer tube.

Reseat the outer shaft on the back holders.
• Place the selected partitions in the inner shaft at the required locations.
• Once all the partitions are in place, take the outer shaft from the back holders and slide over the inner shaft while the sampler is on the holder.

Removeable partitions for zone sampling

PVC Stand, place the inner shaft on the set of holds closest to you and the outer shaft on the back holders.

Includes Pvc Storage Tube
Brush kit - 2 Nylon brushes with long PVC handles to clean the tubes
PVC stand, 22" long, to hold the outer tube and the inner tube separately
