

## Point Sampler

### Large Volume Sampling from a Set Point

The new Point Sampler from Sampling Systems is ideal for taking samples at a specified depth. Can be used for sampling both free flowing and sticky, cohesive powders.

- Large 100ml sample size
- 316 stainless steel
- Suitable for use with free flowing and cohesive powders

#### Operation

1. Ensure the sampling window is closed and then push sampler into the product to the required sampling depth
2. Rotate sampler through 360° - this will open the sampling window and push the surrounding product into the sample collecting chamber
3. Rotate the sampler backwards through 360° to close the sampling window
4. Withdraw the sampler

Stock No.	Length	Sample Volume	Material
675 1640A1000	1000mm	100ml	316 stainless steel
675 1640A2000	2000mm	100ml	316 stainless steel

## Power Sampler

The Power Sampler consists of a convenient hand held drive unit which is used to drive an auger. The auger draws the powder up the lance and into the collecting vessel.

- Free Flowing Powders and granules. Cohesive Powders
- 316 stainless steel (contact parts).
- Satin Finish

#### Operation:

Insert the lance into the product. The auger within the lance will draw the product up the lance and deposit it in the collecting vessel. Reversing the direction of the auger will allow material within the lance to be returned at the end of sampling.

**Drive Unit Sets** Drive Unit and 2 batteries, Sampling Lance, Battery Charger (requires 230v 50Hz supply) and Carrying Case

Part No.	Description	Length	Lance Type	Suitable for Powders
675 1215A300	Drive Unit Set with 300mm lance	300mm	Horizontal	Up to 2mm in diameter
675 1215A600	Drive Unit Set with 600mm lance	600mm	Vertical	Up to 2mm in diameter
675 1215A900	Drive Unit Set with 900mm lance	900mm	Vertical	Up to 2mm in diameter
675 1215A1200	Drive Unit Set with 1000mm lance	1200mm	Vertical	Up to 2mm in diameter

Accessories	675 1215W500	Sample Bottle 500ml (suitable for use in bottle holder)
	675 1215C01	Stainless Steel Bottle Holder - use in place of sterile bags
